## AWARDS

**Best attendance** October 2018  
ReCoded

**Top graduate** October 2018  
ReCoded

## CERTIFICATIONS

**Intro to front end development** September 2018  
Flatiron schools

**Front end development bootcamp** October 2018  
ReCoded

## HOBBIES

Working out

Reading

Refactoring code

Gaming

## LANGUAGES

**Kurdish**  
Native

**English**  
Professional Working Proficiency

**Arabic**  
Intermediate communication skills

## SKILLS

### Programming languages

Dart, JavaScript, TypeScript, PHP, Ruby

### API Design

REST, GraphQL

### Frontend Development

Svelte, React, Redux, Redux-thunk, Vue, Vuex, Tailwind, Bootstrap, SPA

### Desktop Development

ElectronJS

### Database Skills

MySQL, SQLite, PostgreSQL, ORM, ODM, MongoDB, Migrations

### Agile Methodologies

Scrum, Kanban Boards, eXtreme programming

### Operating Systems

Windows, MacOS

### DevOps Tools

Gitlab, Docker

### Programming Paradigms

OOP, Functional, Imperative, Declarative, Reactive

### Backend Development

Laravel, Ruby On Rails, Node, Sapper, NextJS

### Mobile Application Development

React-Native, Flutter

### Software Testing

Jest, PestPHP, Laravel Dusk, RSpec, Capybara

### Software Design Principle

SOLID principles, Clean Code, Refactoring, DRY, Domain Driven Design, Test-Drive development

### UI/UX Skills

Adobe XD, Material Design

### Soft Skills

Teamwork, Work Ethic, Communication, Leadership, Critical Thinking, Positive Attitude

## WORK EXPERIENCE

### Freelancer (October 2018 - Present)

Developing enterprise application using technologies such as Flutter, Dart, Svelte, React, Rails, Laravel

### High Tech (September 2019 - February 2020)

Full Stack web developer

took part in developing the whole application, in an agile working environment, whilst thoroughly testing, designing, creating the APIs. managed a team of three people, guiding them throughout the process. Using a technology stack of SvelteJS, NodeJS, and GraphQL.

### Bashi Ltd (January 2019 - September 2019)

Mobile Application developer

built the application from the ground up, removing extra/unused parts of the software to enhance the speed and performance of the application by 100%, rewrote the application with react-native from the ground up, using react's best practices and industry standards

### CoEquality (September 2018 - November 2018)

Front End web developer

final international project while in boot-camp. Using tech stack of ReactJS with GatsbyJS, lead the project in a team of 2 people, in an agile working environment, and got positive feedback from the client, over the course of 2 months.

## PROJECTS

### GraphQL-unified-mutations August 2020

<https://github.com/A7madXatab/graphql-unfied-mutations>

a set of utility functions to make your graphql mutations predictable by making them have the same signature, method name pattern, with function being provided for both front end , and backend.

### Reactive Resume August 2020

<https://github.com/AmruthPillai/Reactive-Resume/pull/271>

contributed to the open source project, by adding support for Arabic language

### Simple Flutter I18n January 2020

[https://github.com/A7madXatab/simple\\_flutter\\_i18n](https://github.com/A7madXatab/simple_flutter_i18n)

a minimal package to manage internationalization in flutter applications, first used in my own projects, then open sourced the solution to this package

## EDUCATION

### Re:Coded Bootcamp (July 2018 - November 2018)

Front End Web Development

came out the top student in a group of 20 people. learned the basics of web development and UI\UX design, and soft skills such as email writing to public speaking.

### Flatiron school (July 2018 - September 2018)

Intro to front end web development

### Salahuddin University (October 2017 - October 2021)

**Bachelor's degree** Software Engineering
